

Steve St. Angelo: The Energy Cliff, Green Energy Myth, and Our Future

Description

With the world heading into deeper troubles in 2021, Steve St. Angelo who runs the site SRSRoccoReport.com sat down and chatted with the folks at Geopolitics & Empire. In the interview, they discussed the impact of the coming ENERGY CLIFF on the global economy and markets. They also talked about how this would impact Green Energy, gold, and the cryptos. While some think we are heading towards a Mad Max scenario, Steve believes it will be different.

Even though the world is heading towards a collapse, due to the coming ENERGY CLIFF, it will likely take some time to play out. But, yes, the situation will become grimmer. So, for those who want to prepare for the negative impacts of the energy cliff, it's best to work steadily towards an alternative game-plan. But, as time goes by, it will become more difficult to make the changes.

Unfortunately, as the light-bulb goes off in citizens' minds worldwide, the exodus from the big cities to the country-side may become harder. Is it really likely that we are imminently facing a retrenchment of shocking proportions for the modern life as we know it today?
