

Daszak: "...you insert the spike proteins from those viruses, see if they bind to human cells"

Description

[*Authored by Natalie Winters via TheNationalPulse.com,*](#)

EcoHealth Alliance President Peter Daszak – who collaborated with the Wuhan Institute of Virology on research funded by Dr. Anthony Fauci’s National Institute of Allergy and Infectious Disease – appears to boast about the manipulation of “killer” SARS-like coronaviruses carried out by his “colleagues in China” in a clip unearthed by The National Pulse.

Daszak made the admission at a 2016 forum discussing [“emerging infectious diseases and the next pandemic,”](#) which appears to be at odds with Fauci’s repeated [denial](#) of funding gain-of-function research at the Wuhan Institute of Virology.

While describing how his organization sequences deadly viruses, Daszak describes the process of “insert[ing] spike proteins” into viruses to see if they can “bind to human cells” as being carried out by his “colleagues in China”:

*“Then when you get a sequence of a virus, and it looks like a relative of a known nasty pathogen, just like we did with SARS. **We found other coronaviruses in bats, a whole host of them, some of them looked very similar to SARS. So we sequenced the spike protein: the protein that attaches to cells.** Then we...*

*Well I didn’t do this work, but my colleagues in China did the work. You create pseudo particles, **you insert the spike proteins from those viruses, see if they bind to human cells.** At each step of this you move closer and closer to this virus could really become pathogenic in people.*

“You end up with a small number of viruses that really do look like killers,” he adds.

The comments follow growing evidence that Fauci’s NIAID has deep financial and personnel ties to the Wuhan Institute of Virology – and that Daszak’s EcoHealth alliance was one of the primary proxies [funneling](#) the money to the Chinese Communist Party lab.

Over a [dozen](#) research papers carried out under a \$3.7 million National Institute of Allergy and Infectious Disease (NIAID) grant list the Wuhan Lab’s Center for Emerging Infectious Diseases Director Shi Zhengli as a co-author alongside Daszak. Shi has [included](#) these Fauci-backed grants on her resume.

The Wuhan lab has also listed the National Institutes of Health (NIH) as one of its “partners,” secretly [erasing](#) the mention in March 2021.
