

London Protests Against the Lockdown

Description

Massive crowds took to the streets of London today to protest against COVID tyranny.

Video footage from the air and on the ground show massive crowds.

The sign this woman is holding in the first frame of the video clip below:

We're Not From the Left or Right We're From the Bottom and We're Coming for Those on TOP!

It appears that race and political affiliation were put aside in this protest, which is what is needed if the masses are going to have any effect against the Globalists.

[#londonprotest](#) well today's protest even got coverage on BBC, ITV and Sky. What are they up to? They ignored the protests on 15/5/21 and 29/5/21. Possibly this was the biggest one yet? [#freedom](#) [#TakeOffYourMask](#) pic.twitter.com/b5NwZmrobV

Saving the children from the bioweapon shots seemed to be a common theme.

And where are similar protests in the USA?

Oh, that's right. You have to go to a public school board meeting to see parents up in arms about COVID measures because they want to keep using the Nanny State's school system to babysit their children so they don't have to.

And if we do see protests, they will probably be much smaller than this one in London today, with BLMers on one side and Trump supporters on the other, and they won't be protesting against the Globalists, but fighting each other instead.

If the masses do rise up together to overthrow tyranny, I'd bet on the UK over the US any day. It looks like they are fairly unified in taking down Boris Johnson and the rest of the hoodlums in Parliament.
