

Breaking News! Dr. David Martin reveals Fauci's Trail of Covid Patents' since 2002

Description

Dr David Martin was one of the speakers in the Plandemic films, whose work history for 20 years has involved investigating biological weapons. You will see him explain evidence that patents exist, which you can look up at: <https://www.uspto.gov/> disconfirming what the media, doctors, scientists, and government agencies around the world have said about SARS-COV-2 and the spike protein jab. Dr. Martin's bombshell testimony reveals that we – the people of the world – have been lied to in a big way.

This is a **SARS-Cov-2 patent** filed in April 2002 by researchers from University of North Carolina at Chapel Hill and also Ralph Baric for a “an infectious, replication defective, coronavirus particle, that specifically targets lung epithelial cells wherein said cell is a coronavirus permissive cell.....” This virus was genetically modified to infect humans more effectively! The research and development of this research was funded by Dr. Anthony Fauci from the NIH! There were claims that this research was initiated to develop HIV vaccines using coronaviruses as vectors. However, the research deployed genetically modifying platforms to enhance the coronavirus to infect human cells using the ACE2 receptors.

Patent filed in April 2003 by US CDC for the SARS-CoV and SARS-CoV-2 genome. (Note that US laws do not allow a naturally occurring virus to be patented.)

Patent Number: 46592703P and 776521 concerning the SARS-CoV-2 were classified by the CIA and masked in the last 24 hours! (These patents cover PC RCT testing platforms for SARS-CoV-2.)

This patent was filed by Sequoia Pharmaceuticals, Inc. on 28th April 2003 for the antivirals to treat

SARS-CoV and SARS-CoV-2. The company was later absorbed by Pfizer and Johnson + Johnson.

Patent filed on 5th June 2008, but approved in 2015, by Ablynx Pharma (former Sequoia Pharmaceuticals) for the polybasic cleavage found on the SARS-CoV-2 genome that allows access to human cells via ACE2 receptors!

Another more than 73 patents were filed between 2003 to 2018 regarding various aspects of the SARS-CoV-2.
