

UK Funeral Director Calls Out the Covid Crime Policy

Description

One of our readers pointed out to us, below, this very telling piece of information from the trenches of the "Covid death" grounds. This is not about statistics or abstract numbers.

Listen to a UK funeral director speaking of his experiences over the last 20 months and what he sees as the coming future. He takes major personal risks in order to expose the government's COVID-19 death fraud since 2019.

The man is spot on.
