The provision would allow the Occupational Safety and Health Administration to fine companies 70,000 for not forcing employees to take the COVID vaccine, and escalate the fine to a staggering 700,000 for “willful” or “repeated” refusals to comply with the regime’s demands. [Biden Admin Gave Border Patrol ‘Official Notice’ to Get Vaxxed By November or Be Fired, Says Whistleblower](#) –**Biden regime to reduce Border Patrol manpower via vaccine mandate firings even as Biden’s border crisis reaches fever pitch** | 28 Sept 2021 | Tonight the Republicans of the House Judiciary Committee, led in a letter by Rep. Jim Jordan, claimed that a whistleblower informed them the Biden administration has given “official notice” to the U.S. Border Patrol for agents to accept one of the controversial COVID-19 vaccines by November or lose their jobs. This comes after Joe Biden promised to make agents “pay,” citing the debunked claim that agents used a “whip” to attack Haitian migrants, when in reality, the photo depicted standard horse reigns used to direct the animal. In a tweet, the House Judiciary GOP Twitter account wrote, “Whistleblower alleges that Border Patrol agents have been given official notice that they must be fully vaccinated by November 2021 or face termination.” In the letter, Rep. Jim Jordan highlights the risk behind reducing the number of border patrol agents as the Biden immigration crisis continues to reach fever pitch.

UK Government Report: Vast Majority of Delta Variant Deaths Are VACCINATED People, Not Unvaccinated People –These are the government’s own numbers | 28 Sept 2021 | A Public Health England Technical briefing released in September 2021 entitled “SARS-CoV-2 variants of concern and variants under investigation in England” has some findings that do not bode well for vaccine supporters. The numbers show vaccinated people contracted and died of the so-called “Delta” variant of Coronavirus at a far greater rate than unvaccinated people between February 1, 2021, and September 12, 2021. During the time period in question, unvaccinated people reportedly accounted for 257,357 Delta cases out of 593,572 total Delta cases (approximately 43 percent), and 722 out of 2,542 Delta deaths (approximately 28 percent) “within 28 days of positive specimen date.” What does that mean? It means that the vast majority of Delta deaths in England during this period occurred among vaccinated people, NOT unvaccinated people.
