

Vaccinated Individuals Can Still Spread Covid-19

Description

This is common knowledge by now:

- Emerging data suggest that Delta could spread more readily than other coronavirus variants among people vaccinated against COVID-19. ([Nature](#), Aug. 12)
- Vaccinated People With Breakthrough Infections Can Spread The Delta Variant, CDC Says ([NPR](#), Jul. 30)
- UC study finds similarities in COVID viral loads between vaccinated, unvaccinated people ([KTXL](#), Oct. 6)
- CDC study says COVID-19 can spread in vaccinated ([AP](#), Sep. 21)

Alas, the president of the United States doesn't **doesn't know that**.
