## Dr. McCullough: Winning The War Against Therapeutic Nihilism

### Description

Another great exposé by Dr. Peter McCullough. If you ever had any doubts about whether standing up against the vaccine was worth the hardship, if you thought that the rejection and opprobrium encountered from your close ones or the strangers on the street had any merit, if you were ridiculed by the stupid ones, if you had a moment of weakness in trusting your own instincts and the sense that something malefic was going on – the words and the data presented by Dr. Peter McCullough are the vitamins to help reinforce the resistance.

This cannot last much longer. The number of dead and the maimed by the “vaccine” is growing by the day. The popular backlash is growing and in the end it will bring justice to us all against the perpetrators of this utterly criminal, genocidal attack on humanity.
