[Austria Now Threatening PRISON to Anyone Who Refuses Vaccine –The bill will also make regular booster shots compulsory.](#) | 1 Dec 2021 | Unjabbed Austrians who refuse to comply with the government's draconian mandates could face prison sentences and crippling fines for non-compliance. After initially placing unjabbed citizens under lockdown, Chancellor Alexander Schallenberg announced that the jab would become compulsory from February 1 onward. Questions as to what would happen to those who refused to comply with the mandate have now been answered in the form of a draft that was leaked to the media. "Under the bill, anyone who refused to attend a scheduled vaccination appointment would receive an official summons from local authorities. If an individual failed to show up, they would then be summoned one more time within the next four weeks," RT reports... Summit dot news reports: No one will be "forcibly brought" to a vaccination center to get jabbed against their will, although rest assured, **they will be "forcibly" placed behind bars if they continue to refuse**. If it passes, the legislation will stay in place for three years, with the government deciding if having recovered from COVID is a reasonable exemption.

Other new restrictions include limiting household gatherings to 20 people, capping outdoor gatherings at 50 people and requiring unvaccinated people to avoid indoor gatherings — in other words, a lonely and potentially hungry Christmas for the unjabbed... Citizens must register to travel, and all unvaccinated people entering the province must be quarantined and take a test to prove they’re not infected after 10 days in isolation.

This reflects a new level of internet censorship, but it is not just publishers who are in the crosshairs...it is all of us. Christian breaks it down in this Ice Age Farmer broadcast.

According to the bill, also called H. R. 550, the government would provide 400 million in taxpayer dollars to fund “immunization system data modernization and expansion,” a system otherwise defined as “a confidential, population-based, computerized database that records immunization doses administered by any health care provider to persons within the geographic area covered by that database.” Rep. Mary Miller (R-IL), who was one of the 130 Republicans to vote “no,” told Breitbart News exclusively on Wednesday that the legislation would enable the federal government to “track” unvaccinated Americans who “will be targeted and forced to comply with Biden’s crazy ‘global vaccination’ vision.”

In a letter to McConnell (R-Useless Eater-Ky.), Freedom Caucus members blasted what they described as Joe Biden’s “very damaging, unAmerican, and in the worst cases, unlawful vaccine mandates” and called on Senate Republicans to use “all procedural tools at your disposal to deny timely passage of the CR [continuing resolution] unless it prohibits funding — in all respects — for the vaccine mandates and enforcement thereof.”

[Federal judge blocks Gov. Greg Abbott’s Texas social media censorship law before it takes effect](#) | 2 Dec 2021 | A federal judge in Austin Wednesday blocked Texas’ social media censorship law , which prohibits large social media platforms like Facebook and Twitter from censoring users “based on their political viewpoints.” The law, known as House Bill 20, was signed by Gov. Greg Abbott on Sept. 9 and set to take effect Thursday. However, U.S. District Judge Robert Pitman wrote in his ruling that the measure interferes with platforms’ First Amendment right to moderate content disseminated on their platforms. In a September Washington Post op-ed, Abbott argued the need for the law “has been apparent for years.” He also voiced support for the measure in a Twitter video, saying “Freedom of speech is under attack in Texas. There is a dangerous movement by some social media companies to silence conservative ideas and values.” [category scandemic – corona virus]
