

## The Imploding American Civilization – Shocking Video

### Description

Focusing our attention on Philadelphia, just north of imploding Baltimore City and just south of migrant-infested New York City, the 'City of Brotherly Love' has streets that look straight out of the zombie apocalypse TV series "The Walking Dead."

X user [Catch Up](#) shared a startling video titled "This is Philadelphia," showing zombie streets of working-class folks overdosing on drugs. The video did not specify what drugs these folks were on, but we have detailed before Philadelphia was hit with a veterinary sedative xylazine, also known as the ["tranq" epidemic](#).

Meanwhile, the [shit-covered streets in San Francisco](#) are so bad that Democrats in City Hall have decided to hire a new tourism official to shift the perception of the crumbling metro area. Good luck with that one.
