

Imminent NATO Defeat in Ukraine, Russia-Europe Reconciliation

Description

Ed Note: Algora Publishing made the same prediction in a book authored by Claudiu Secara, published in 1997 and written in the 1990s: [*The New ComonWealth*](#).

Quote: *"The centuries long Russian-Anglo-American love-hate relationship has been evolving dramatically from late 1978 until today, for sure. However, one might notice that it is being redesigned in such a way as to accommodate in the long run a more assertive, more successful and more powerful Russia overlording its European and southern peripheries. A first sketch of such an analysis I presented in 1992 at the ISA conference in Atlanta. 'Post Soviet, Euroslavia'"*

ON THE COVER

Emmanuel Todd

"We are on the eve of a tipping of the world"

Shock. The historian who announced the fall of the USSR long before the hour predicts "the defeat of the West", title of his new work.

INTERVIEW BY SAÏD MAHRAÏE

Un book that shakes up certainties, annoys by its excesses and challenges by its work - theological is always a suscep book - likely to interest The Point. Especially when the author his name is Emmanuel Todd, demographer, historian and sociologist. Among his achievements are - socials, the announcement, in 1976, in The Final Fall, from the location of the USSR interview in the Index of infant mortality. Forty-seven years older

New era.

"The vaporization of Protestantism made disappear which constituted the strength and specificity of the West", according to Emmanuel Todd.

late, for what he says is his last book ("the loops looped"), he predicts The Defeat Of The West (Gallimard) in the infitecontext in Ukraine. L'auteur ne déclare pas la victoire de la Russie de Poutine, mais certains liront son livre sans pouvoir se défaire de cette idée. Les causes de ce déclin, selon lui, sont multiples: fin de l'état-nation; decline of the industry, the one that allows the manufacture of the weapons delivered to Ukraine; "zero state" of the religious patrician first of all Protestantism; rising infant mortality in the United States

ITEM

"The defeat of the West is not a victory for Russia. The West is destroying itself..."

Historian and demographer Emmanuel Todd, who predicted the collapse of the USSR in his book "The Final Collapse" back in 1976, this time predicted the defeat of the West and said that humanity is on the eve of changing the world.

The main reason for the impending defeat of the West, according to Todd, was "the evaporation of Protestantism, which led to the disappearance of what constituted the strength and specificity of the West."

A renowned French historian and sociologist better known for predicting the Soviet Union's dissolution well in advance now foretells the West's overthrow in his newest book.

French historian Emmanuel Todd believes that NATO is already [losing the Ukrainian conflict](#). He likewise concluded that the defeat would eventually culminate in Russia's reconciliation with Europe and its rapprochement with Germany, contrary to the [wishes of the United States](#).

This view was expressed to Le Point Magazine during an interview ahead the release of his new book *La Defaite de L'Occident* (The Defeat of the West).

In the book, he denounces the Western attitude toward Russia, stating that *"Avoiding the rapprochement [between Germany and Russia](#) was one of the US goals. This rapprochement would have signed the ejection of the United States from the European system of power. Americans have preferred to destroy Europe rather than save the West."*

Todd's *La Defaite de L'Occident* excerpt highlights America's waning status as a global superpower and its weak military-industrial complex.

The French historian also underlined the diminished influence of Europe, once represented by a strong partnership between France and Germany, highlighting that Germany has taken a dominant role since the 2007-2008 financial crisis.

Furthermore, he pointed out that in the wake of the Ukrainian conflict, the European Union has distanced itself from Russia, therefore hurting its own trade and energy interests.

“We also saw Emmanuel Macron’s France vaporize on the international stage, while Poland became Washington’s main agent in the European Union, succeeding in the role of the United Kingdom that became outside the Union by the grace of Brexit...On the mainland, overall, the Paris-Berlin axis was replaced by a London-Warsaw-Kiev axis piloted from Washington,” Todd opined.

Todd decried the [dominant narrative in the West about the conflict in Ukraine](#): **“We are in a completely Putinophobic and Russophobic world.”** He went on to argue for a pluralistic view that recognizes different perspectives. **“I am fighting to keep the West pluralistic. If we look for my values, they are values of truth and pluralism,”** he remarked.

Addressing the question of how this year’s US election might alter the trajectory of the Ukrainian conflict, the expert highlighted Russia’s steadfast commitment to its existing course. **“For the Russians, it makes no difference. For Russia is at war with America, and they ignore changes in rulers,”** according to Todd.
