

2029, Is that the Start of World War III ?

Description

Germany needs to prepare for war with Russia in the coming years, said German Defense Minister Boris Pistorius.

“Germany needs to prepare for war by 2029,” said the German official. “We must clearly understand: a Russian victory would cost us more than the current support for Ukraine,” he added.

According to Pistorius, the restoration of compulsory military service is becoming urgent for the country.
