

The Royal Rabbit Hole

Description

We are approaching one of those “turning points” in history, which remake our lives in ways radically different from the past. No, not in the way that WEF planned it. Not at all.

Graham Greene wrote that men’s lives have a turning point, a point of no return. (He added that most men do not recognize it at the time.) This also applies to societies, to cultures. We are at such a turning point for generations to come.

For one, the UK is due for a makeover. The firebrand Liz Truss is the gal who is appointed to bring down the House of Windsors. Think about it. Two days after the Queen anointed her as the Prime Minister – the Queen dies. Just like that. What was the cause of death? What medical procedures were done, how, where, etc? Not a word.

Still, more interesting is who is Liz Truss. She is the “abolish the monarchy” firebrand of the Liberal Party. Watch her in her youth. Yes, go Liz!

The video below is a 20-minute documentary published by [Nicholas Veniamin, of “We The People.”](#) It was produced by *Jay Myers Documentaries*, before the Queen’s recent alleged death.

This documentary does a great job including clips of actual news reports and interviews, and it covers a LOT of material in only 20 minutes, so it is easy to see that topics such as sexually abusing minors, kidnapping children, ties to [Freemasonry](#), Satanic Ritual Abuse, and the alleged murder of Princess Diana all have solid evidence behind them.

This is not a picture of the “Royal Family” you will see in the corporate media. The video is called “[Royal Rabbit Hole](#).”

You may skip the first 11 minutes, the real interesting part starts at around 11:00. And then the last 2-3 minutes of the interview with the member of the royal retinue are quite shocking, even if the testimony is only half true.
