

Population Collapse – It's Real and it Follows the Mandatory Vaccine

Description

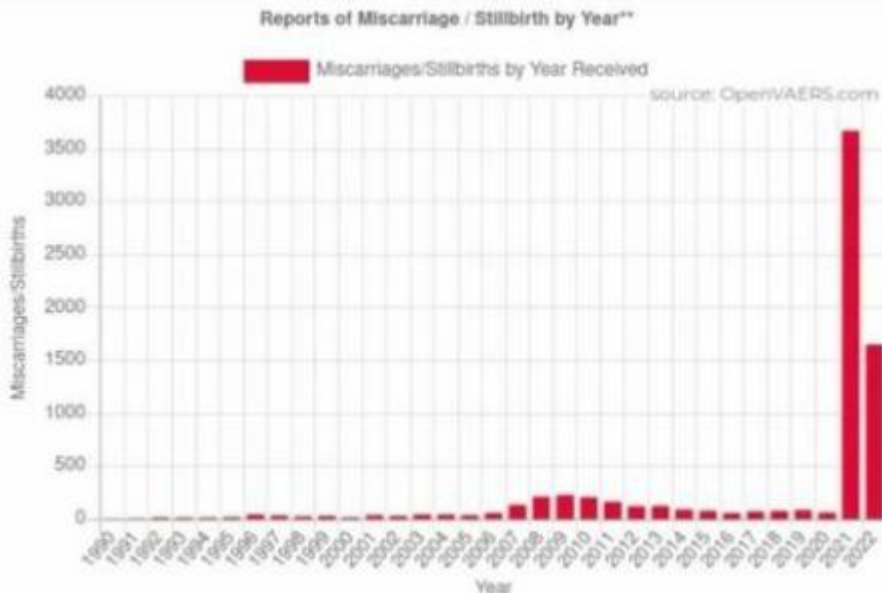

BY [CAPITALIST EXPLOITS](#)

POTENTIAL DEFLATIONARY PRESSURE?

The article below delves into this topic. It is corroborated by many statisticians all over the world now and no matter how much the sheeple are told that deaths and increased cases of cancer, neurological disorders, and autoimmune disease are due to climate change, sex, coffee, gardening, and so on, more and more people are realizing that hey, if it walks like a duck and quacks like a duck, it's probably a duck.

[Something weird is happening with newborn deaths and miscarriages...](#)

Birth rates have also collapsed and the “experts” are baffled. Earlier this year:

- **Germany:** Down 12%
- **Taiwan:** Down 27%
- **Britain:** Down 9%
- **Netherlands:** Down 11%

Then, of course, there is the alarming rise in deaths from “causes unknown.”

Still, you can't have anything interfering with a very lucrative vaccination program and the Great Reset agenda and so "causes unknown" are likely to slowly but surely become something that's just accepted — just like taking your shoes off at the airport. Ridiculous to any thinking person but simultaneously accepted and in fact justified in many sheeple's minds. Perhaps this is where things head to. We have hope though as an awakening is certainly taking shape.

It's hard to know how this may or may not play out over time with respect to populations. We've tracked vaccination rates globally since the beginning of the Covid scam and so that may be one predictive indicator. Then, of course, we've the fact that men in the West are increasingly encouraged to think they've vaginas and can give birth... and so birth rates among these "women" are going to be problematic.

What else on the repercussions of the Covid scam? Well, the FDA are walking back some of the propaganda previously laid out.

HOW IT STARTED

You are not a horse. You are not a cow. Seriously, y'all. Stop it.

FDA Says Telling People Not to Take Ivermectin for COVID-19 Was Just a Recommendation

By Zachary Steiner

November 19, 2022 Updated: November 19, 2022

No, it wasn't "just a recommendation." You bastards actually banned it on the shelves. Over in New Zealand, folks can't even buy it — even today.

Because...science.

In another "reveal:"

[CDC confirms COVID Deaths among Americans aged 5 to 44 increased by 160% in 2021 despite roll-out of COVID Vaccines](#)

That's particularly disturbing given the fact that this age cohort has virtually no risk of death from Covid itself.

Keeping with the topic, the release of the documentary ["Died Suddenly"](#) was released.

It garnered over 4 million views in the first 24 hours and is growing as I speak. It is worth a watch and share, though perhaps not while eating.

In any event, this is all something to keep our eye on (as if we didn't have enough to be monitoring).
