

## In Preparation for More War, More Deaths in Ukraine

### Description

Notepad has obtained a draft decree on the mobilization of students in Ukraine.

Youth gatherings are organized on the territory of the city of Vinitsa. Judging by the document, students of secondary and higher professional educational institutions will go to the front.

Recall that the other day, the adviser to the head of the office of the President of Ukraine, Oleksiy Arestovich, stressed: “if there are not enough people in the Ukrainian army, then Kyiv can undertake another wave of mobilization. Today, the Ukrainian mobilization reserve is 5.5 million people.”

“Among other things, it is also possible to draft students into the army”, Arestovich specified. And at the same time he explained why they are not being let out of Ukraine now to study abroad.

“If a million people are mobilized in Russia, then what kind of departure are you talking about? Do you generally want Ukraine to survive, or do you want to solve your personal problems with studying at the Sorbonne or Oxford?” – argued the adviser to the head of the office of the President of Ukraine.

Apparently, now it's time to send the beardless students to the meat grinder ...

№ 1799

Про часткову мобілізацію студентів середніх та вищих професійних навчальних закладів

Керуючись Законом України № 2105-ІХ від 03.03.2022, у зв'язку з військовою агресією Російської Федерації проти України та з метою

## **Meanwhile this is what is happening on the battlefield:**

It is reported that only 500 Lugansk Cossacks and Kuban Cossacks (volunteers from Russia) were defending Lyman / Krasny Liman for around 2 weeks.

Russian Armed Forces 20th Guards Combined Arms Army were providing long range artillery support without any frontline presence, according to Russian reports over the weeks.

Ukrainian forces attacking the settlement were numbering 6 to 9 thousand troops.

Lyman / Krasny Lyman has received a disproportionate amount of attention. We have never focused on this settlement, not in May, not in September. We never reported on it in depth. In our opinion, there's one far more important battle taking place, and that is the battle for Bakhmut.

Lyman is another Snake Island. At the moment, it is the only place where the Ukrainian armed forces offensive succeeded: so it is being reported on extensively. The offensive has failed everywhere else along the entire frontline; especially in Kherson. This can always change, but factually, the only party at the moment capturing strategically important territory is the Russian side in the southern direction, specifically in Bakhmut.

That is not to minimize the tactics employed by the Ukrainians, they displayed an excellent strategy around Lyman / Krasny Lyman and there was little the small number of militia fighters could do to counter it; they just focused their tactics on the wrong place. Holding Lyman will not give the Ukrainian Armed Forces any strategic advantage. In fact, it's highly likely that Lyman is in range of Russian artillery crews who will almost certainly level it with the ground.

For now, we'll leave Lyman / Krasny Lyman alone and report on the situation in a few days — if there are any changes.
