

## “Project” Covid-19 was Funded Years Before the Scamdemic

### Description

Documents from US National Institute of Health requested by and published to Judicial Watch conservative watchdog group show US NGO EcoHealth Alliance started doing taxpayer-funded research on MUTANT VIRUS from bats back in 2013 at Wuhan Institute of Virology.

Showing project in the making YEARS before COVID-19 outbreak is another stake in claim by EcoHealth Alliance that COVID-19 totally didn't come from a lab.
